

## Take your home and cottage off-grid in ONE day

### **Power Pak** off grid solar system in a box

#### **Save Money and Time**

The Power Pak box is designed to save you money and time, by combining all the components required to go off-grid in a single box.

#### **Easy Installation**

The system integrates solar charge controller, inverter and all necessary components. Gone are the days of hooking up many separate parts.

#### **Ready to go**

Just plug in solar panels and batteries, and you are ready to go!

#### **Tested and Safe**

No worries about electrical safety code. The Power Pak is **ULc approved**.

#### **Easy Monitoring of system power and voltage**

The Power Pak comes with built-in meters to show system power and voltage.

#### **Multi-Purpose**

The flexibility of the Power Pak makes it useful for different purposes:

##### ■ **Off-Grid System (Mode 2 setting)**

By connecting Solar panels to a Power Pak, the batteries can be primarily charged by solar energy, creating an off-grid system. Combine this with a stand-by generator that acts as a secondary energy source.

##### ■ **UPS (Mode 1 setting)**

By using the grid as a power source\*, use it as back-up power for appliances (i.e. fridge, furnace, water pump, etc.) The Power Pak will automatically switch to battery power when the grid goes down. Also protects appliances from electrical surges.

##### ■ **Hybrid System**

Use solar panels as the main power source, but keep grid connected as a back-up power source\*.

\* This eliminates the need to buy noisy, costly diesel generators, while reducing carbon emissions and noise at the same time.

# Conventional method

# VS

# Power Pak

## Many parts to obtain

## ? Complex to install

## ⚡ Hazards

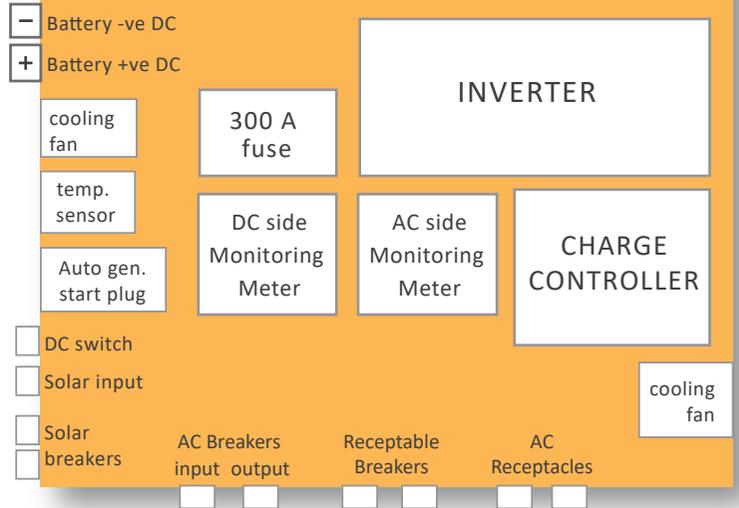

Prone to errors and electrical hazards  
Not meeting electrical safety code

## 💰 Costly

## All parts INTEGRATED in a box

### Components inside the Power Pak

## ✔ Ready to go

## ✔ Tested

## 🛑 Safe - ULc approved for safety

## 🕒 Savings

# Customer testimonials

“ I highly recommend Microgreen. I put off investing in solar equipment for years because every time I met with solar equipment suppliers they would up sell me to a system I couldn't afford. **Microgreen is quite different: they won't let you buy anything you don't need.** I have a high level of trust in their integrity and their expertise. ”

- Darrell Jarvis

“ My house in the Bahamas is in the middle of the devastation caused by hurricane Dorian last year, and grid power is still not available today... I shipped the Power Pak along with a few solar panels down there and that absolutely changed our lives. It was **very simple to hook the Power Pak** up to our existing electrical panel, turning off the main breaker first and eliminating the potential grid connection, and becoming off grid. The advice and assistance we received from Microgreen was second to none. I would like to say how satisfied I am with the purchase of my Microgreen 4KW Power Pak. ”

- Denis Beauchesne

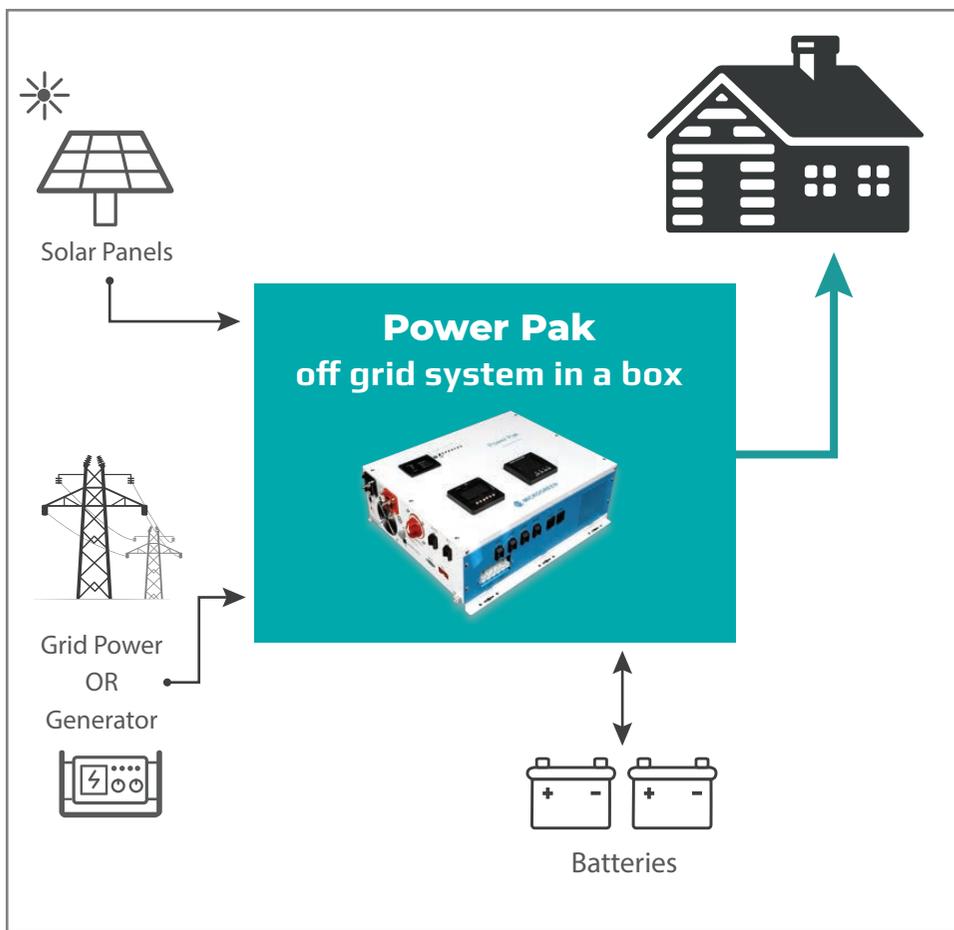

## Quick & easy to install - examples of Power Pak installations

Power Pak and battery bank set up in a shed for some of our customers' cottage.

**Power Pak** solar system integration box

## KEY FEATURES

- All components assembled in a single box, safe to handle, ULc certified**  
 Inverter, charge controller, DC monitor, AC monitor, circuit protection, and connectors are integrated into a single box, saving cost of obtaining separate components, and the time of integrating them.
- Accepts multiple sources of power**  
 Solar for off-grid use, grid for UPS use, generator as a secondary source for off-grid use, hybrid mode uses solar as main, and grid as back-up source.
- Easy monitoring of system**  
 Built-in meters for battery voltage, generated solar power.
- Customizable, expandable**  
 Add solar panels and batteries to expand capacity when needed.

## 3 MODELS AVAILABLE:

### Power Pak MINI

For mobile usage (RVs, marine)  
 3 KW capacity  
 12 VDC input

### Power Pak COMPACT

For typical cottage  
 4 KW capacity  
 24 VDC input

### Power Pak GRANDE

For residential  
 10 KW capacity  
 48 VDC input

Scan this QR code for more info on the Power Pak and complete product specifications.

## Power Pak specifications summary

MODEL	MINI	COMPACT	GRANDE
INVERTER POWER RATING	3 KW pure sine wave	4 KW pure sine wave	10 KW pure sine wave
DC VOLTAGE	12 V	24 V	48 V
CONTROLLER	40 A MPPT	40 A MPPT	80 A MPPT
DC MONITOR	EP Solar MT-50	Ep Solar MT-50	Ep Solar MT-50
AC MONITOR	Displays AC volts, watts & KW consumed	Displays AC volts, watts & KW consumed	Displays AC volts, watts & KW consumed
DC FUSE	300 A	300 A	300 A
AC BREAKERS	Input: 30 Amp Output: 25 Amp	Input: 30 Amp Output: 20 Amp	Input: 80 Amp Output: 50 Amp
SOLAR INPUT	150 V / 520 W	150 V / 1040 W	150 V / 4000 W
WARRANTY	2 years	2 years	2 years
